Md. Nasimur Rahman

Full-stack Software Engineer

rhythm4538@gmail.com +8801973763372 LinkedIn Github

PROFESSIONAL SUMMARY

Full-stack developer skilled in **React, Next.js, Node.js, and Express**, with expertise in **server-side rendering (SSR)**, **client-side optimization**, and **seamless API integration**. Proficient in **Stripe payments, AWS Lambda, and Redis caching**, with experience in **code reviews, agile teamwork, and delivering high-quality production features**.

SKILLS

Languages: JavaScript, TypeScript, C/C++, Java, Python
Web Technologies: React, Next.js, Node.js, Express.js, React Native, Stripe, Tailwind CSS, Socket.IO, React GSAP.
Databases: MongoDB, MySQL, Redis
Cloud & Tools: AWS Lambda, Git, Firebase

WORK EXPERIENCE

Software Engineer I – ShellBeeHaken Ltd. *Jan 2025 – Present*

- Led development of production-ready frontend and backend features using **Next.js**, **Node.js**, **GraphQL**, and **MongoDB**, delivering scalable and maintainable solutions.
- Integrated an **AI-powered persona chatbot** with **agentic and RAG** capabilities.
- Integrated and maintained **Stripe-based payment systems** for subscription management.
- Integrated and maintained **webhook** for **Stripe-based payment systems** for subscription management.
- Integrated and maintained **Stripe-based individual and company ID verification.**
- Developed **serverless functions with AWS Lambda**, improving scalability and reducing infrastructure costs.
- Implemented **caching with Redis** to enhance system performance and response times.
- Conducted **code reviews** and mentored junior engineers, improving code quality and reducing bugs.

Associate Software Engineer – ShellBeeHaken Ltd. *Jan 2024 – Dec 2024*

- Built and optimized **RESTful APIs** and integrated frontend features for high-traffic web applications.
- Designed reusable components and UI enhancements using **React, TypeScript, and TailwindCSS**.
- Collaborated in Agile environment with daily standups, sprints, and version control using Git.

Trainee Software Engineer – ShellBeeHaken Ltd. *Sep 2023 – Dec 2023*

- Contributed to backend and frontend development of multiple live platforms.
- Implemented real-time features using **Socket.IO**.

Intern Software Engineer – ShellBeeHaken Ltd. *Jan 2023 – Jun 2023*

- Gained hands-on experience in full-stack development with **Next.js, Express.js, MongoDB**.

PROJECT

Food Delivery based Platform:
Developed **webhooks** for **Stripe subscription payments**, integrated **individual** and **company ID verification**, notification systems with **AWS Lambda**. Implemented various full-stack features like food subscription plans etc.
Kriyakarak(Service Market Place):
Developed real-time messaging with **Socket.IO**, reservation system, and frontend/backend modules.

EDUCATION

Rajshahi University of Engineering & Technology 01/2018 – 09/2023
BSc in Computer Science and Engineering

ONLINE JUDGE STATISTICS

- **Codeforces:** rhythm_1703083 solved 800+ problems
- **Leetcode:** rhythm_1703083 solved 100+ problems and other online Judges like LightOj, UVA, HackerRank, Toph etc - solved 200+ problems

PROGRAMMING CONTESTS EXPERIENCE

- 14th in RUET Gyanjam 2019 (Team name: Ekhon_Kichui_Parina)
- 45th in IUT IUPC 2019 (Team name: RUET_Amra_Olosh)
